

smart deep laser

SUBDERMAL MULTILASER

MONO | DUAL
WAVELENGTH

Dermatological

Surgical

Vascular

What is DEEP LASER?

Smart Deep Laser is the most advanced subdermal laser device, featuring **Dual Wavelength** technology to ensure greater safety during procedures.

The laser works in the **subdermal layers**, selectively destroying fat cells, stimulating **long-lasting skin retraction and collagen production**.

It also offers excellent efficacy in **vascular treatments**, such as **varicose vein removal**.

Ideal for men and women:

LipoLaser

Body contouring

Skin tightening

Skin laxity treatment

Facial and body rejuvenation

Scar and stretch mark treatment

Facial and body contouring

Hyperhidrosis correction

Vascular treatment

WHERE TO USE IT?

Eyelids (upper and lower)

Inner arms

Double chin

Abdomen

Neck

Hands

Back

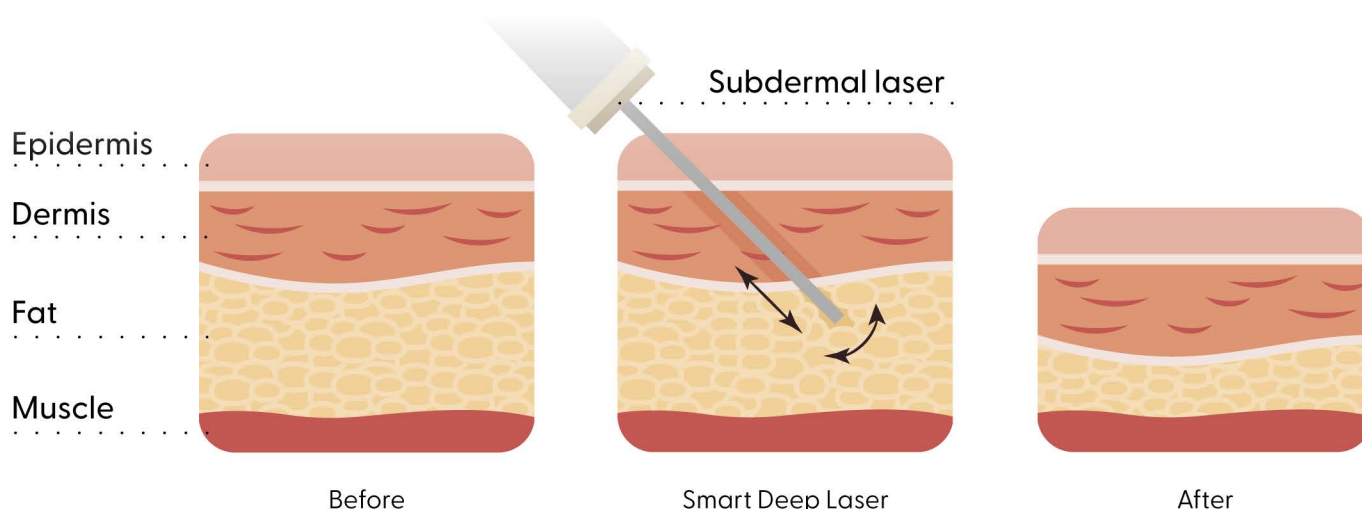

Inner thighs

HOW DOES IT WORK?

Smart Deep Laser, with Dual Wavelength technology, reduces localized fat and improves skin laxity safely and effectively, while also helping to cauterize blood vessels and prevent bleeding.

The laser energy **selectively heats fat cells** (selective photothermolysis), leading to the destruction of localized fat and simultaneously stimulating collagen production to improve skin **firmness and elasticity**.

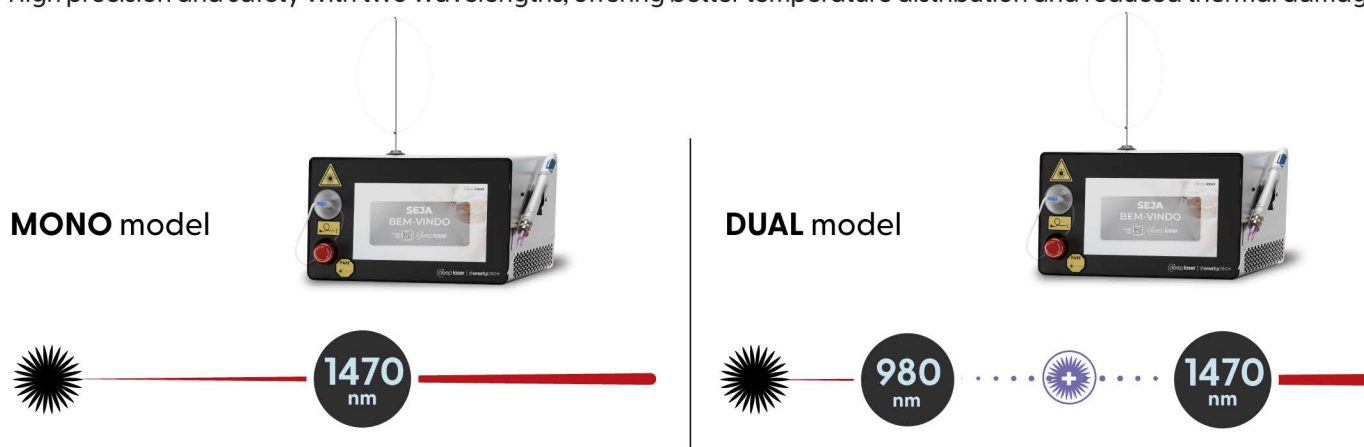

+ ADVANTAGES WITH SMART DEEP LASER

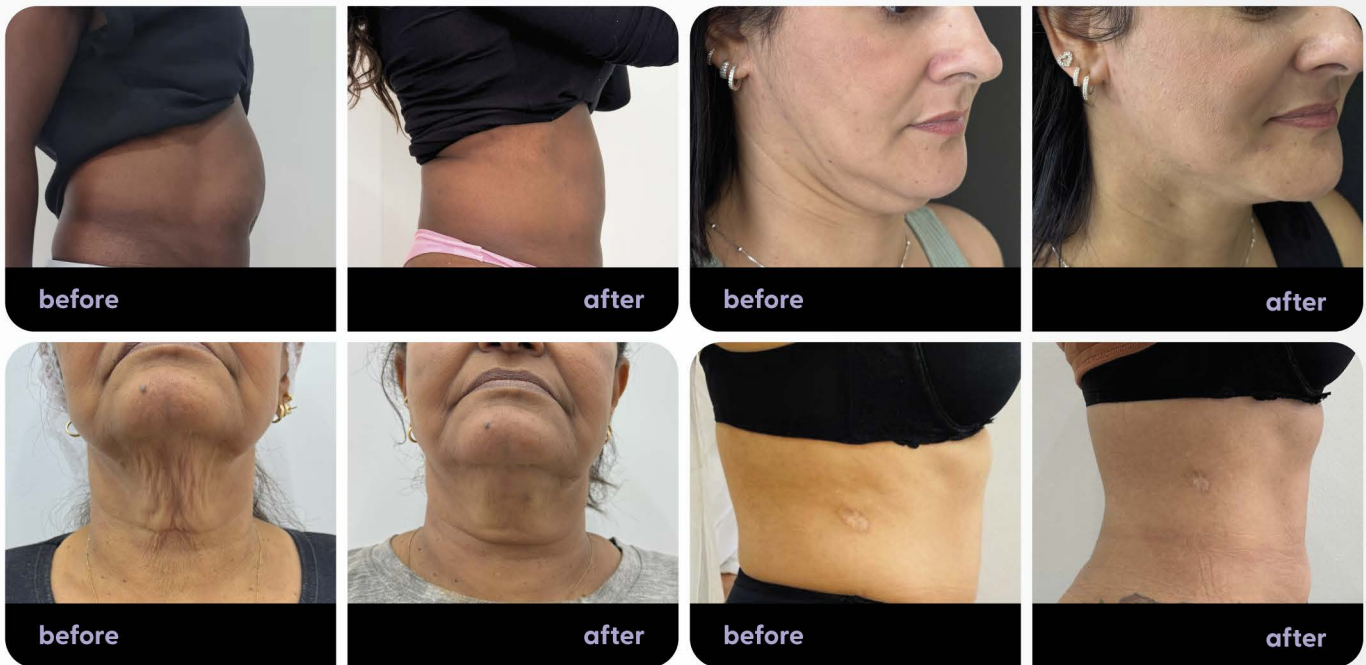

- Prevents excessive bleeding due to affinity with hemoglobin
- Effective in reducing localized fat
- Selective absorption by adipose tissue
- Effective for treating skin laxity
- Ideal for enhancing facial and body contour
- Ideal for vascular therapies
- Does not require a surgical center
- Fast procedure, with accelerated recovery and no downtime

ADVANCED TECHNOLOGY MONO OR DUAL WAVELENGTH

High precision and safety with two wavelengths, offering better temperature distribution and reduced thermal damage.

RESULTS

With **10 years in the market**, our purpose is to **revolutionize the Brazilian aesthetics landscape**, focusing on science and results.

We are a reference in the market for **advanced aesthetic technology**, including microneedling, mesotherapy, pressurized intradermotherapy, and dermocosmetics.

Our commitment to providing **high-performance equipment and cosmetics** has evolved into a wide range of products developed with **cutting-edge safety and technology**.

We invest in research and maintain **rigorous quality control** to deliver agile solutions through **high-quality products**.
