Smart GR **EXO**

Technology

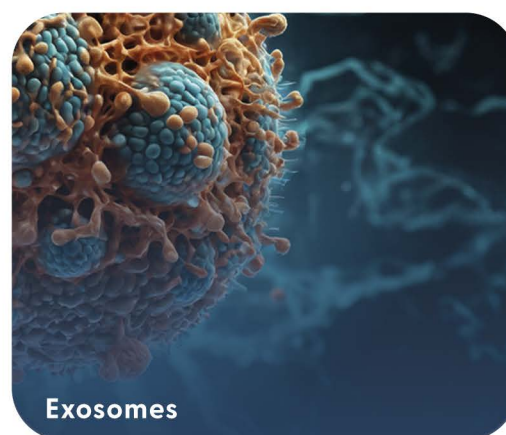

Advanced Exosome
technology for
Skin Renewal

What is Smart GR Exo Technology?

Smart GR Exo is Smart GR's exclusive exosome technology, combined with high-performance ingredients that deliver unprecedented advanced results. This dermatological solution was developed to manage the skin aging process through multiple mechanisms of action, mainly targeting the reduction of wrinkles and fine lines and the enhancement of the extracellular matrix.

Smart GR Exo is available in a complete line of cosmetic products, covering the beginning, middle, and end of professional skincare procedures.

Smart GR's exosomes are enriched with Smart technology and high-performance actives, delivering advanced results like you've never seen before:

Regenerative Technology

Targets wrinkles that are not softened by botulinum toxin

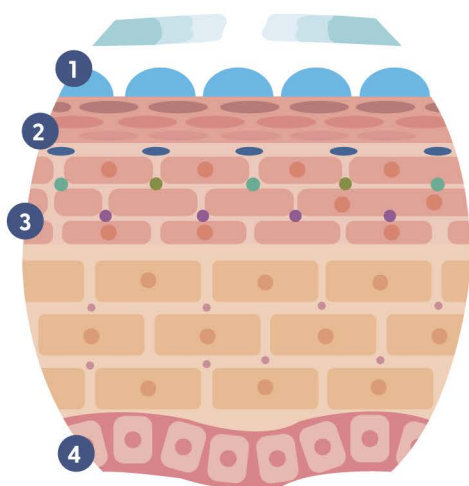

Acts on the skin's intercellular communication

Restores the **rejuvenated appearance** that fillers alone can't provide

What is the mechanism of action?

Smart GR Exo works by helping to restore and maintain intercellular communication, acting across multiple layers of the skin: the epidermis (stratum corneum and basal layer), dermis, and even the muscle layer. Its multi-mechanism of action can be summarized as follows:

1

In the epidermis, it attracts water and nutrients to the **stratum corneum**, improving the skin barrier function and maintaining skin hydration.*

2

Still **in the epidermis**, it acts on the basal layer, supporting the renewal of keratinocytes and regulating melanin deposition, evening out skin tone and texture.*

3

In the dermis, it stimulates the production of the extracellular matrix, boosting collagen synthesis while also reducing collagen and elastin degradation.*

4

In the **muscle layer**, it decreases contraction strength by interfering with the SNARE complex activity, helping reduce dynamic wrinkles and prevent static ones.*

*Actions validated through cosmetic appreciability testing.

Benefits of Smart GR Exo Technology

Smart GR Exosome Technology:

An anti-wrinkle, brightening, and rejuvenating strategy

*According to a cosmetic appreciability assessment of Smart Exo Technology, conducted over 30 days with 165 volunteers.

Results

Analysis performed with 3D Imaging Camera

In an in vivo clinical test, it was possible to observe:

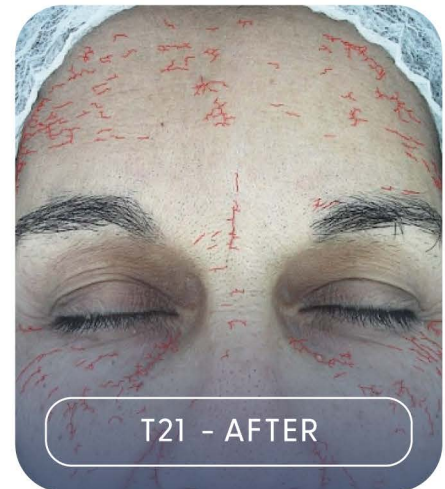

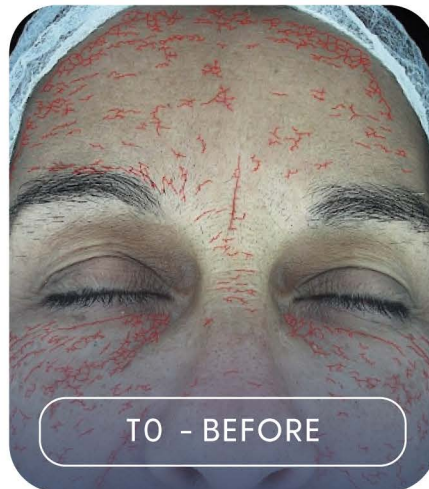

Significant improvement in **skin tone** and **texture**

Significant reduction in **wrinkles** and **fine lines**

*Results refer to Smart Exo Derma Pro technology. Expression lines are highlighted in red. The clinical test lasted 21 days.

Where does Smart GR Exo technology come from?

Smart GR developed its exosome technology from the tangerine of **Jeju Island, South Korea**.

Rare origin

Vegan technology

Complete Smart GR Exo Line

In-clinic Use

Smart Exo Skin Pro

Facial and body anti-wrinkle fluid

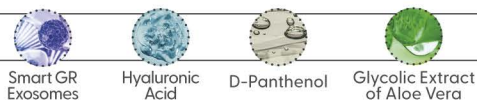

Rich in Hyaluronic Acid

Smart Exo Routine – Exosomes

1 Cleansing

Cleansing Gel
anti-wrinkle and
skin-tone evening

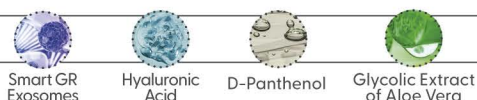

2 Intensive Care

Mask
intense renewal

3 Advanced Care

Essential Water
anti-wrinkle and hydrating

4 Intense Recovery

Serum
anti-wrinkle and firming
